**DETAILED ACTION**

1. The finality of the rejections made in the last office action mailed on October 11, 2005 is withdrawn by the examiner. This office action is in response to applicants' communication filed on June 27, 2005. The replacement drawings, amendments to the specification including abstract and claims 1, 8, 13-14, 20, 23-38 and 40-54 and cancellation of claims 2 and 39 made by the Applicant in his communication have been entered. Objections to the drawing and the abstract are withdrawn in view of the amendments. Rejections made under 35 USC 101 in the last office action has been withdrawn in view of decisions rendered in *ex Parte Lundgren*. Double Patenting rejections made in the last office action has been withdrawn in view of the cancelled claims of the referenced application. Claims 1, 3-38 and 40-54 are pending in the application and have been examined. The rejections and response to arguments are stated below.

**Double Patenting**

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground

provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1, 38 and 51 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 44 and 48 of U.S. Patent No. 09/524,253. Although the conflicting claims are not identical, they are not patentably distinct from each other because they recite the means and steps that are substantially the same and that would have been obvious to one of ordinary skill in the art.

Claims 1 and 38 recite "displaying information relating to one or more analysts' estimates for a selected future event, comprising displaying simultaneously, on an analyst by analyst basis, for selected analysts, an indication of historical accuracy for an analyst based on selected criteria and the analyst's estimate for a future event" that are listed in claims 44, 46 and 48 of Gatto ('253). Predetermined earnings event is interpreted to include a future event.

Claim 51 recites "displaying information relating to security analysts' estimates, comprising displaying simultaneously, on an analyst by analyst basis, for selected analysts, an indication of historical accuracy for an analyst for one or more securities, the current estimate of a future event associated with the analyst for the one or more securities and model information relating to the analyst" that are listed in claims 44, 46 and 48 of Gatto ('253). How long an analyst has been following a security is interpreted as model information relating to the analyst and Predetermined earnings event is interpreted to include a future event.

These are provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

**Claim Rejections - 35 USC § 103**

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 3-23, 38 and 51 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marshall (US Patent 6,073,115) in view of Lundgren (US Patent 5,608,620) as discussed in paragraph 9 of the last office action mailed on March 25, 2005.

***Allowable Subject Matter***

6. Claims 24-37, 40-50 and 52-54 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

**Response to Arguments**

7. In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir.

1992). In this case, the motivation to combine is the benefit that users would have received from combining the teachings. This motivation would have been obvious to one of ordinary skill in the art.

In response to applicant's argument that Lundgren does not teach the step of "analyst by analyst basis, for selected analysts: an indication of historical accuracy for an analyst based on selected criteria; and the analyst's estimate (or recommendation) for a future event", the examiner respectfully disagrees. Lundgren in Column 6 line 53- Column 7 line 18 discloses an indication of historical accuracy for an analyst based on selected criteria. In Column 6 lines 43-45 Lundgren discloses an analyst's estimate (or recommendation) for a future event. Lundgren is not relied upon to teach the step of displaying. Marshall teaches this step. Hence Marshall and Lundgren taken together each all the steps of the claims discussed.

Applicant's other arguments with respect to other claims have been considered but are not persuasive.

### **Conclusion**

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
